

A joint venture which began almost 10 years ago between friends, Lime Design is an award winning exhibition stand design and visualisation company based just 10 miles from the NEC, Birmingham.

### A Decade of Exhibition Design

You can produce a lot of exhibition stand designs in nine years, we should know because that's exactly how we've filled our time for almost the past decade!

We are firmly focused on the exhibition industry and have exhibition design and visualisation down to a fine art!

We regularly visit shows to keep on top of the current trends and stay ahead of the competition and it helps that we're based just 7 miles from the NEC, Birmingham.

### Design Portfolio, our pride & joy

We've invested a fair bit of time and effort perfecting our skills over the past nine years and we're always keen to show off our portfolio - Obviously our best marketing tool, a picture speaks a thousand words as they say!

With our client's permission, we've selected a few of our most recent project to demonstrate our awareness, vision and forward thinking. If you have five minutes to give us a call, we'd be happy to highlight our best bits!

### 3D visualisation, a fine art!

We strive to keep our skills and technology current, a challenge in the fast paced exhibition and technology industries - but one we feel is important.

Using the latest technology and visualisation software isn't cheap but we've been using our tool of choice - Autodesk 3D Studio Max for nine years and know a trick or two about effective and engaging exhibition design while delivering on time and budget.
